1 First section

1.1 My first slide of the first section

This is the content of the slide called ‘My first slide of the first section’.

This will be a second slide in section ‘First section’, without title.

1.2 My second slide

This second slide can be very long, it will be splitted among various slides thanks to the attribute ‘.allowframebreaks’ This second slide can be very long, it will be splitted among various slides thanks to the attribute ‘.allowframebreaks’ This second slide can be very long, it will be splitted among various slides thanks to the attribute ‘.allowframebreaks’ This second slide can be very long, it will be splitted among various slides thanks to the attribute ‘.allowframebreaks’ This second slide can be very long, it will be splitted among various slides thanks to the attribute ‘.allowframebreaks’ This second slide can be very long, it will be splitted among various slides thanks to the attribute

‘.allowframebreaks’ This second slide can be very long, it will be splitted among various slides thanks to the attribute ‘.allowframebreaks’ This second slide can be very long, it will be splitted among various slides thanks to the attribute ‘.allowframebreaks’ This second slide can be very long, it will be splitted among various slides thanks to the attribute ‘.allowframebreaks’

This second slide can be very long, it will be splitted among various slides thanks to the attribute ‘.allowframebreaks’ This second slide can be very long, it will be splitted among various slides thanks to the attribute ‘.allowframebreaks’ This second slide can be very long, it will be splitted among various slides thanks to the attribute ‘.allowframebreaks’ This second slide can be very long, it will be splitted among various slides thanks to the attribute ‘.allowframebreaks’ This second slide can be very long, it will be splitted among various slides thanks to the attribute ‘.allowframebreaks’ This second slide can be very long, it will be splitted among various slides thanks to the attribute ‘.allowframebreaks’ This second slide can be very long, it will be splitted among various slides thanks to the attribute ‘.allowframebreaks’ This second slide can be very long, it will be splitted among various slides thanks to the attribute ‘.allowframebreaks’ This second slide can be very long, it will be splitted among various slides thanks to the attribute ‘.allowframebreaks’

2 Very poor second section

2.1 Conclusion and outlooks

pandoc is great to actually create article, webpage and slides from the same markdown file.

This text will appear only in the article/book/webpage but not in the beamer slides. This could be useful to give additional details which don’t fit a presentation but a more complete document.
